

V9 series – E-mail function

E-Mail functions were enhanced.

- Conditions: Individual settings of send timing and target addresses.
- Message : Multilingual messages in accordance with multi-language setting.
- Security : SSL/TLS communication supported.

Conditions

You can specify a timing to send a message (occur/reset/both) and recipient's address to each message individually so that you can send it to **different operators who need it**.

Example 1: Send a message only when an alarm occurs.

Example 2: Send a message in accordance with alarm condition

Settings

1. Go to [Alarm Server] > [Alarm Device] and double-click the number you wish to send an email.

2. In the [E-Mail] dialog, select "Setting: Enable". Specify the timing and the recipient(s) of the message.

Select "Enable".

Select timing.

Select recipient's address.

* "E-Mail setting" is needed in V-SFT-6 or on the V9 local screen. Refer to "V9 Reference Manual 2" for further details.

* You can change the addresses etc., from [System screen] on the V9.

It is easy to understand the status because you receive only the information you need. You can change recipient's address from V9 unit.

Messages

For multilingual screen program, it is possible to send the message in all the languages defined regardless the language displayed on the screen. Since alarm message is shown in different languages, **recipients in different country or language can understand the status.**

Displayed in Japanese

アラーム
アラームの履歴表示を行います。
発生中は、メッセージを高レベルを通知いたします。
また、過去のアラーム履歴をバックアップファイルから読み出すことが可能となりました。

内容	レベル	発生
安全レバーが解放されました	警告	2014/08/18 0
安全レバーが解放されました	警告	2014/08/18 0
侵入者を感知しました。	警告	2014/08/18 0
貯水タンクの水深が 15% 未満	注意	2014/08/18 0
ABCDラインが停止しました。	警告	2014/08/18 0
変換バーコードが未登録で	注意	2014/08/18 0

China

E-Mail text (example)

```
2014/08/18 09:22:35 <ON> 安全レバーが解放されました
2014/08/18 09:22:35 <ON> Safety lever has been released.
2014-08-18 09:22:35 <ON> 已释放保险杆
2014.08.18 09:22:35 <ON> 안전 레버가 해제되었습니다.
```

Multilingual message is easy to understand and convenient!

Security

SSL/TLS communication was supported. **As data is encrypted to send, you can protect your data from possible dangers such as sniffing.**

Settings

1. Go to [System Setting] > [Ethernet Communication] > [E-mail] and check "Use SSL/TLS Communication".
*Available only when authentication is "SMTP-AUTH".

Select "SMTP-AUTH".

Check "Use SSL/TLS Communication".
