## Data Collection System -Inventory Control-

Issue No. 21 2010

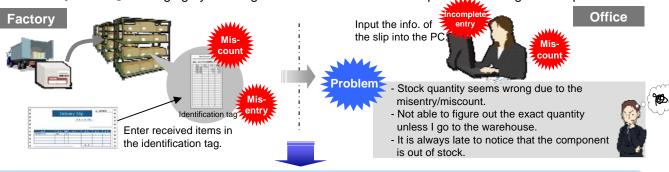

#### **Advantages of Using Data Collection System**

- Simple system configuration allows for compact installation without worrying about the space.
- Change in specifications requested from the user is easily supported by using the configuration software (V-SFT-5).
- Inventory control system can be built easily and at an affordable price.

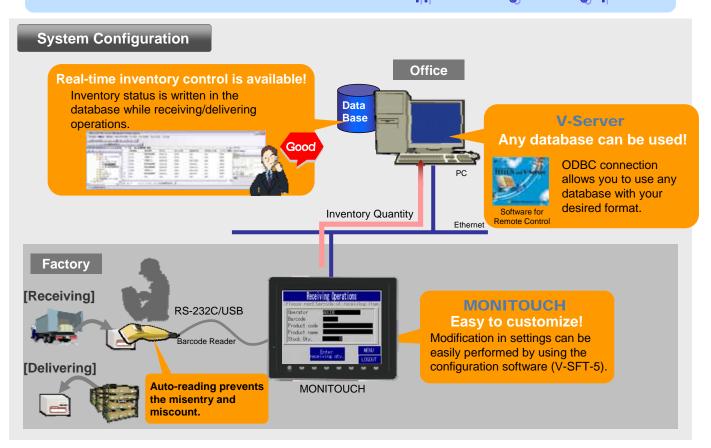

# **Inventory Control System**

Supporting system for inventory control and warehouse operation

[Traditional Operation] Managing by entering received item's info in the slip after receiving the component.

# MENITOUEH & V-Server will support receiving/delivering operations.

## **Installation/Operation Image**

Register the data on inventory control system at the time of [Receiving Operations] receiving operations.

1) Read a barcode of the receiving parts.

2) Get the info. of the parts that corresponds with the barcode info, from database.

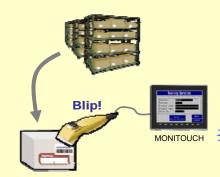

3) Enter the received quantity and write the stock quantity to the database.

#### [Delivering Operations]

Confirm the time for ordering the parts at the time of delivering operations.

1) Read a barcode of the parts to deliver.

2) Get the info. of the parts that corresponds with the barcode info. from database and input delivering quantity in the database.

3) In case the stock quantity of the part becomes less than predetermined quantity, MONITOUCH can show the warning to urge you to place an order.

#### Free version upgrade of the configuration software V-SFT-5

The configuration software (upgraded version) can be downloaded from the following website.
