

<Application Example> Proposal for On-Site Work Efficiency with the V10 Series (PDF Viewer)

Proposal to reduce man-hours

- Complete daily report creation and storage by on-site work! -

- PDF viewer of the V10 series enables users to view PDF files even in work environments where they cannot bring their own PCs.
- By utilizing the datasheet output function, not only daily report creation and data management are possible, but also handwritten data signed on the operation screen can be captured and output in electronic form together. Documents that would conventionally have to be printed on a printer and signed each time can be completed on site.

Complete daily reports as PDF with the operator's direct signature on V10!

Sign daily reports with data sheets and memo pad!

The daily report format can be freely designed. In addition, if you sign a memo pad on the V10, the image will be applied in the daily report.

Reduction of man-hours

Operator-friendly

PDF viewer

Smooth PDF viewing with V10!

Daily reports can be checked on site, and the V10 series offers a comfortable PDF viewer for stress-free viewing of documents.

Improved working environment

Operator-friendly

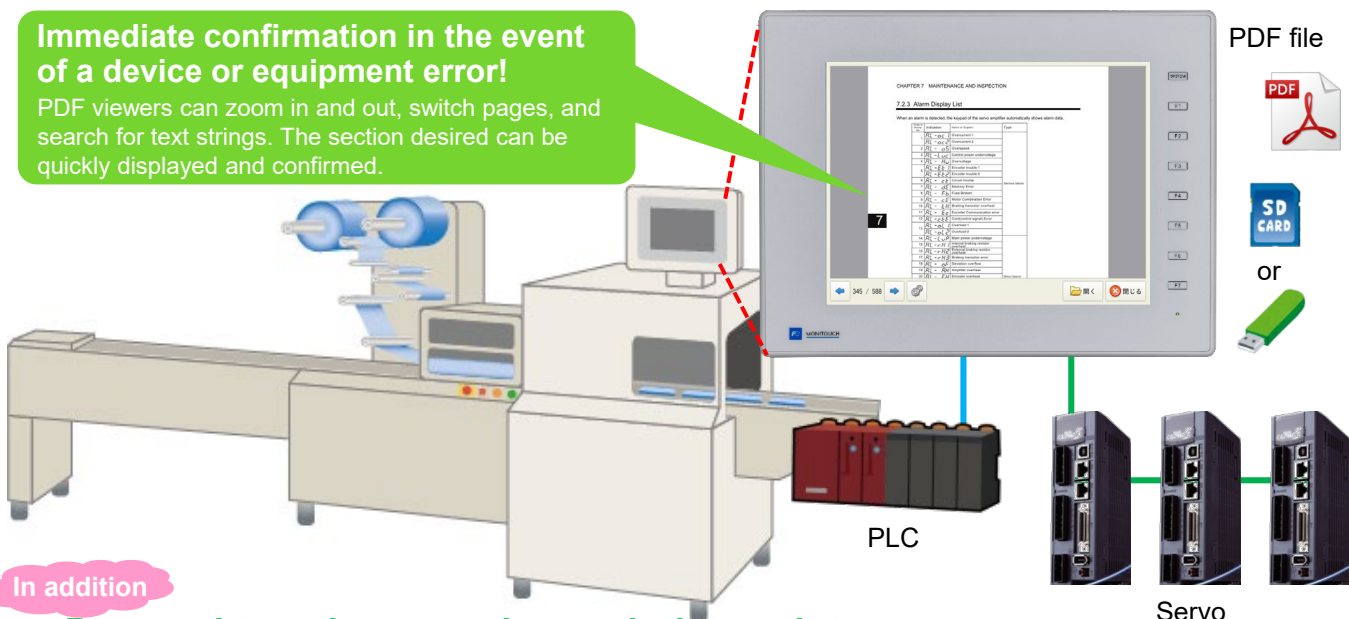

Proposal to improve trouble-shooting operations

- Display of the corresponding manual on V10 ! -

- If PDF manuals for troubleshooting are stored in the SD card in advance, you can immediately refer to the PDF manuals when an error occurs in the equipment at the site.
- Storing manuals for each device (servo, PLC, etc.) built into the equipment allows operators to easily check the manuals themselves without having to return to the office or ask the engineer each time a problem arises. This is effective for urgent cases such as when restarting operations after a vacation or when replacing older equipment with newer models.

Immediate confirmation in the event of a device or equipment error!

PDF viewers can zoom in and out, switch pages, and search for text strings. The section desired can be quickly displayed and confirmed.

In addition

Proposal to reduce man-hours during maintenance

- Display of equipment maintenance manuals on V10! -

- This can also be applied to maintenance manuals. By setting a switch for each process and linking the corresponding page in the PDF file, the desired page can be displayed by simply pressing the switch.
- When the site and office are connected via LAN, PDF files on SD cards can be easily updated or added, eliminating the need for engineers and maintenance workers to replace the files each time at the site.
