

<Useful Function> Combination of MONITOUCH and Smart Device - 2D Code Creation -

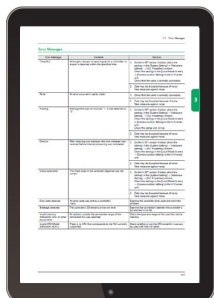

What is 2D code display?

* V10 series: Scheduled to be supported in October 2025

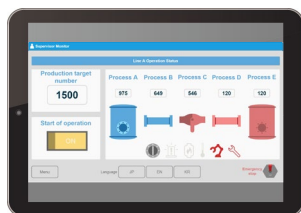

- 2D codes can be created and displayed on MONITOUCH.
- By linking with Web Server function, 2D codes can be read with smart devices to quickly display the dashboard screen.
- Also, by using the URL of a PDF manual or video file as the 2D code information, the file in the web browser can be displayed and played on the smart device.

PDF manual

Web Server function

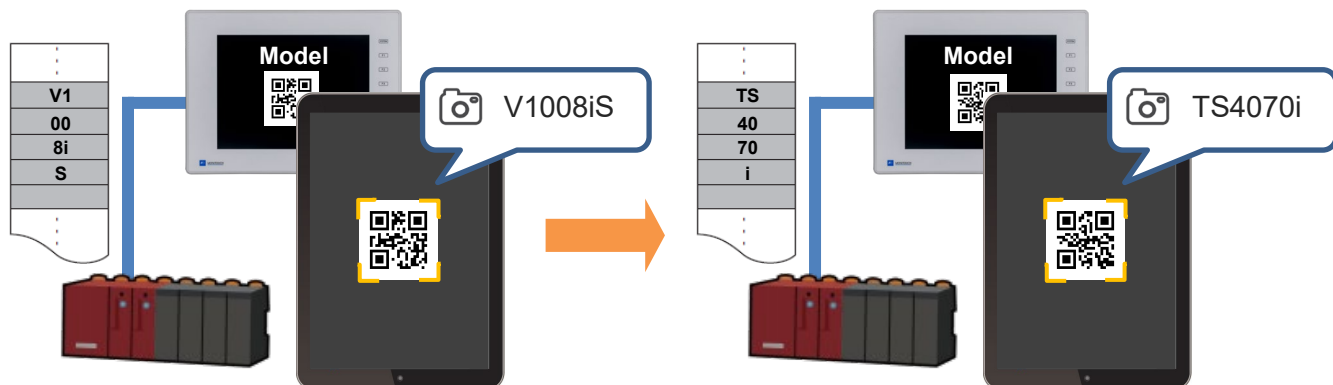

What is Web Server function?

Without installing a dedicated application, it is possible to remotely monitor production facilities in the web browser (Google Chrome) on a computer or a tablet.

*For details, see MONITOUCH EXPRESS No. 191.

- You can also create and display 2D codes using (variable) character strings stored in a specified device.

Operation example

- 2D code creation function is helpful as a means of communication and troubleshooting when an abnormality occurs.

Display of emergency contact

Simply read the 2D code to make a call instantly. With video calls on your smartphone, you can get assistance while showing the equipment status!

Check alarm details in manuals or videos

Access the webpage by reading the 2D code and check the alarm details. You can view PDF or video files to find the solution!

V10 series allows PDF viewing and video playback directly on the unit.

*For details, refer to "Reference manual 2."

To update PDF or video files, just update the webpage in the office!

Office

Access to the inquiry form

Access the webpage by reading the 2D code. You can fill out the inquiry form and attach photos of the issue while checking the malfunction on-site!
