

## V9 series: Improvement by using tablet

You can operate and monitor HMI screen by using tablet and VNC server function.  
All V9 series support VNC server function.  
You don't need to buy wireless LAN access point because our wireless V9 model has a built-in access point.

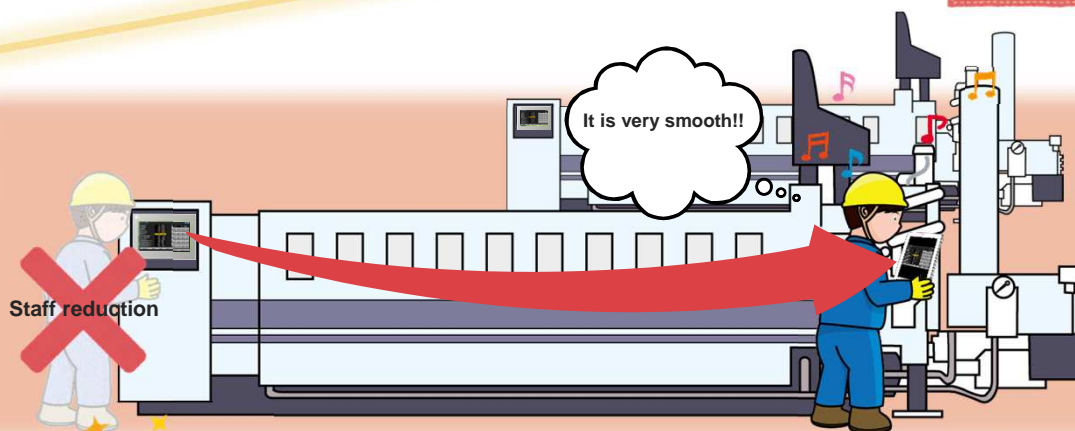

### Working efficiency and staff reduction

BEFORE

When you set up the machine, we need several staffs to adjust the machine. But we want to reduce the number of staffs.

AFTER

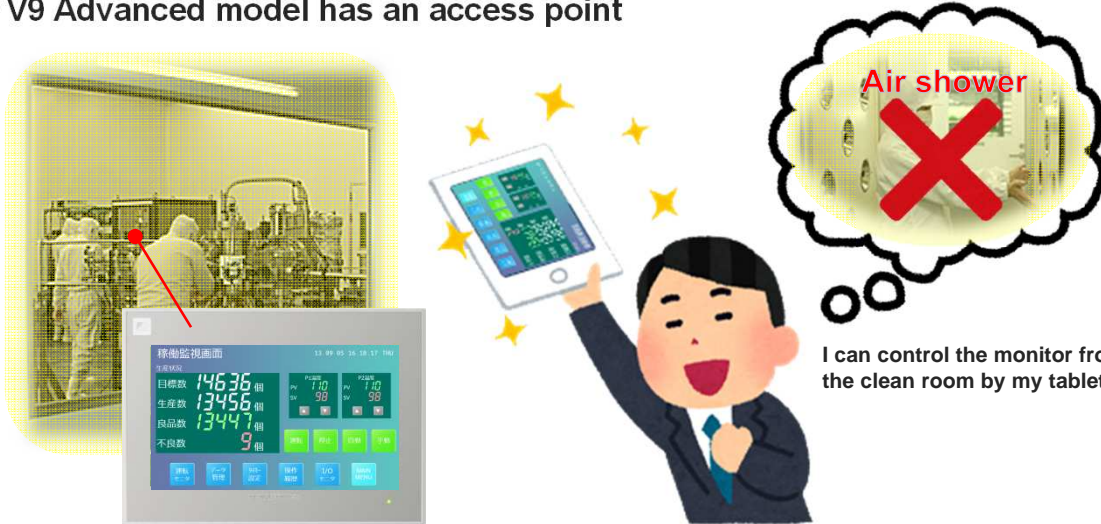

If you use a table to control our touch panel, you can reduce the number of staffs.

**Case Study**

**Reduction of the time to enter and leave from a clean room!!**

You can control V9 screen from your tablet from outside of the clean room. So, you don't need to take an air shower.

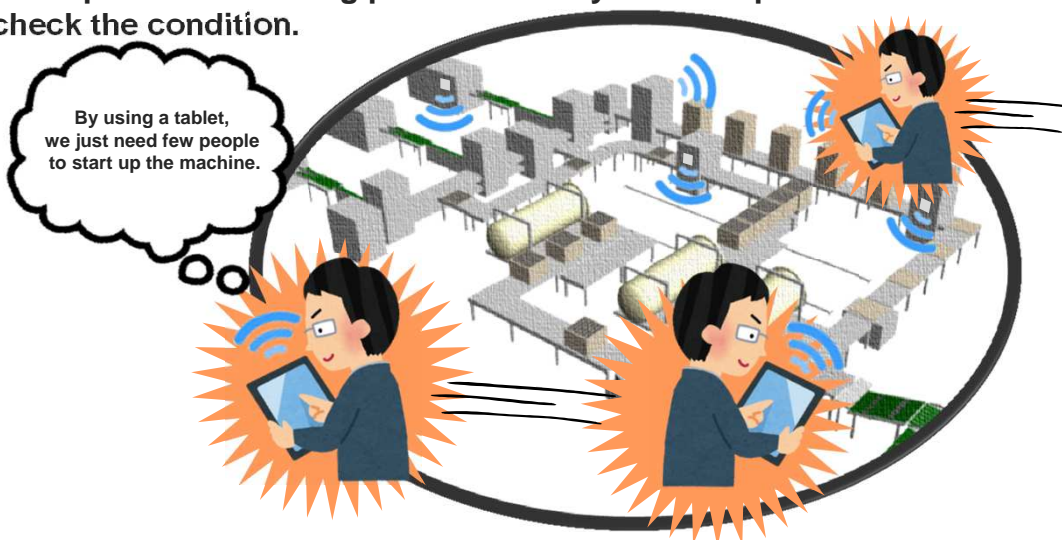

Moreover, you don't need to prepare wireless LAN access point because our V9 Advanced model has an access point

I can control the monitor from outside of the clean room by my tablet.

**Efficiency Improvement of Start-up work and Maintenance!!**

If you use our wireless V9 model, you can monitor and control several V9 touch panel screens from your tablet and smart device. We can improve the working process when you start up the machine and check the condition.
