

Improving Operation by Outputting PDFs Using the V9 Series Data Sheet Screen

Issue No. 92 (January 2017)

Have you ever had trouble using printers?

The V9 series enables paperless operation! This issue introduces the PDF output function of the data sheet screen.

BEFORE

The only way to output the data sheet screen was to print using a printer...

I need space to place a printer.

Using a printer means management of paper and ink will also be necessary.

I wish I could computerize daily reports.

Using the V9 series achieves so much!

AFTER

The data sheet screen can be output to a storage device in PDF format!

The screen can be output in PDF format and also printed out to paper!

PDF file

Paperless work!

In addition!

If an Ethernet environment is configured, PDF files can be transferred to a computer with the SD card or USB flash drive still connected to the V9 series unit!

Ethernet

Office

Transfer

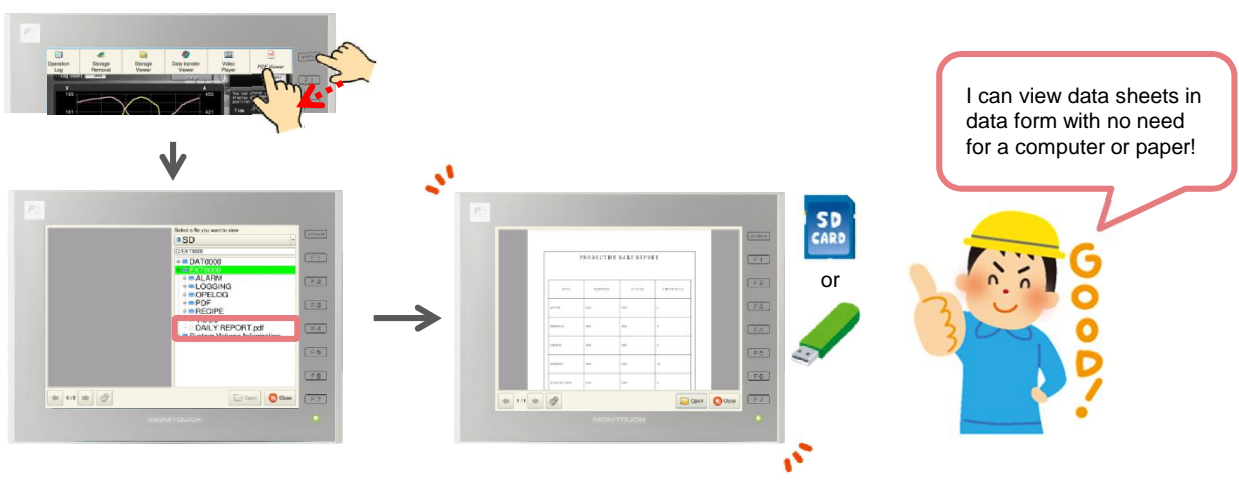

PDF files can be retrieved without actually going to the factory floor!

No more hassles means work reduction!

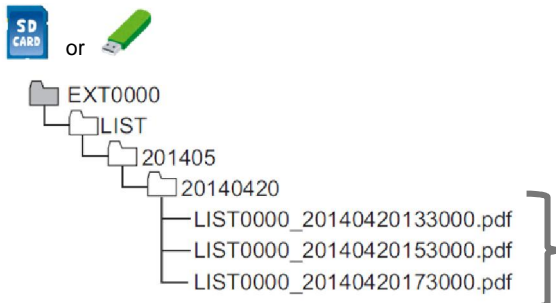

There are even more convenient functions 

View PDF Files on the Factory Floor!

By using the PDF Viewer function of the V9 series, operators can view PDF files on the V9 series unit in the same way as on a computer!

Data sheet files output in PDF format are stored in the "LIST" folder.

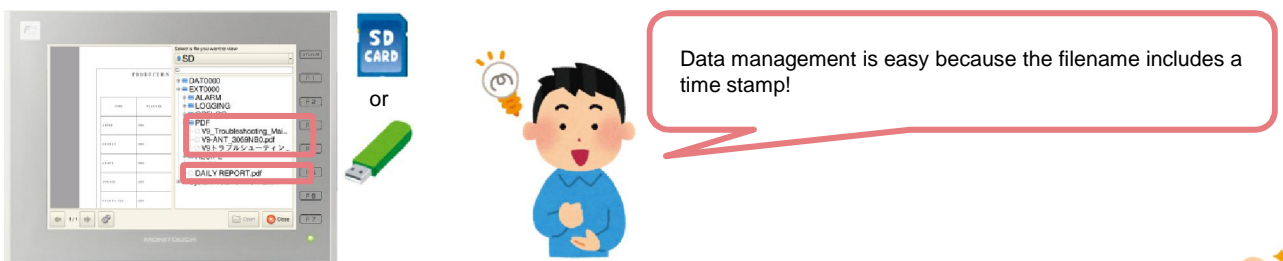

SD CARD or 

EXT0000
├── LIST
│ ├── 201405
│ │ ├── 20140420
│ │ │ ├── LIST0000_20140420133000.pdf
│ │ │ ├── LIST0000_20140420153000.pdf
│ │ │ └── LIST0000_20140420173000.pdf

- (desired filename)xxxx (YYYYMMDDHHMMSS)
Top page Year, month, day, hour,
number minute, second of output
or
- LISTxxxx (YYYYMMDDHHMMSS)
Top page Year, month, day, hour,
number minute, second of output

PDF Viewer can open files stored in any directory, including the "LIST" folder, an SD card, and a USB flash drive!

How would you like starting a new data management system by utilizing PDF output of data sheets?
