

# V-SFT Ver.6 Update Procedure

This document explains the update procedure for V-SFT using the update modules that you can download from our website.

**[Either or both V-SFT-5 or V-SFT-6 already installed]**

Download the update module for V-SFT-6 from our website.

- \* You need to register as a member to download the update module.
- \* If installing V-SFT Ver. 5 in "C:\Program Files" on Windows Vista or later, it may not work properly. Reinstall V-SFT Ver. 5 following the "Update procedure for the V-SFT CD-ROM Ver.5.4.18.0 or earlier".

1. Click "Search" after setting the conditions as below. The update modules are displayed.

The screenshot shows the Fuji Electric Global website search page. The search criteria are set to 'Software' under 'Search Human machine Interface(POD) Documents'. The search filters are: Productgroup: MONITOUCH V9 series, Manualtype: Configuration Software, and Category: Update module. Below the search criteria, there is a 'Search' button. The search results show 9 documents, including various manuals and update modules for V-SFT Ver. 6.0.37.0.

\* "xx" designates the version number.

3. Unzip five downloaded ZIP files to the same directory. Five folders, Disk1 to Disk5, are shown as below.

e.g.: Unzipped in "V6\_update" folder

4. Double-click "setup.exe" in the "Disk1" folder to start installing V-SFT-6.

5. Follow the procedures to update after the installer starts up.

\* Close V-SFT-5/V-SFT-6 before the installation.

\* You need to have authority as an Administrator for the update.

6. You need to download the manuals for help menu separately.

Select "Manuals for V-SFT-6" from the search results in step 2 and download it.

The screenshot shows the Fuji Electric Global website's search interface. The search results are as follows:

Productgroup	Manualtype	Category	Title	Document No.	Discontinued	Type (Size)

7. Double-click the module (EXE file) from step 6.

Follow the procedures to update after the installer is started up.

\* Close V-SFT-6 before the installation.

\* Administrator authentication is required.

**[Neither V-SFT-5 nor V-SFT-6 installed]**

Please purchase DVD-ROM of V-SFT-6.

(The update module from our website is only for the update. It cannot be used for installation.)

\* However, if you have CD-ROM/DVD-ROM for configuration software "V-SFT" or "UG00S-CW", you may be able to update to "V-SFT-6".

The installation procedure differs depending on the OS of your PC and the version of your CD-ROM/DVD-ROM.

For the detailed procedure for installation, see the "Update procedure for the V-SFT CD-ROM Ver.5.4.18.0 or earlier".
